Education

SRM Institute of Science and Technology, Kattankulathur
Computer Science Engineering, CGPA 9.4

B.Tech
May, 2028

Experience

Sentinel Layer
Backend Intern

Chennai, TN
Jun 2026 – Aug 2026

- Engineered robust backend architectures utilizing Go and Python to enhance system resilience against targeted vulnerabilities, improving API response times by 15%.
- Developed and integrated automated security auditing scripts, collaborating with the engineering team to streamline internal deployment workflows.
- Analyzed structural security metrics and implemented real-time threat interception protocols to optimize backend architecture and ensure high system availability.

Independent Projects

Phishing Sentinel | [Github](#)

Jan 2026 – Present

- Developed a real-time phishing detection service to analyze DOM structures and intercept potential threats.
- Implemented real-time API interception and system analysis to flag malicious activities instantaneously, prioritizing structural robustness.

Crime Record and Pattern Analysis | [Github](#)

Nov 2025– Mar 2026

- Engineered a secure, normalized database architecture utilizing PostgreSQL and FastAPI to efficiently store, query, and manage large-scale regional data records.
- Designed a resilient data pipeline to automate data retrieval and statistical analysis, decreasing complex query processing time by 20%.

Leadership & Activities

Aaruush
Committee Head

Chennai, TN
Sep 2025 – Present

- Directed a cross-functional committee of 25+ members to strategize and execute technical events and operational logistics for a national-level techno-management fest hosting 90,000+ attendees.
- Coordinated resource allocation, internal workflows, and on-ground crisis management to ensure the seamless execution of technical domains and workshops.

Skills & Interests

Technical: JavaScript, Python, Go, Java, C/C++, React, Next.js, Node.js, FastAPI, SQL

Language: English, Hindi, German, Russian

Tools & Platforms: VS Code, Git, GitHub, Supabase, Neon Cloud, Vercel, Netlify

Interests: Backend architecture, system robustness, understanding underlying mechanisms of seemingly simple technologies, cybersecurity
